CAREER OBJECTIVE

Aspiring Application Developer with a strong foundation in programming languages (Java, Python), frameworks (Vanilla, React, Node.js, Express.js), and database management (MySQL, MongoDB). Seeking an opportunity to design, develop, and optimize user-friendly applications while enhancing my technical expertise and contributing to innovative software solutions.

ACADEMIC QUALIFICATION

Velammal Engineering College

B.E Computer Science Engineering **CGPA : 8.48**

ST. Antony's Public School

Class 12 - **86%**

Class 10 - **91%**

Chennai, TN

Sept 2023 - Present

V.M Chatram, Tirunelveli

2021 - May 2023

2020 -2021

TECHNICAL SKILLS

- Programming : Python, Java, C, C++, Javascript
- Tools : Html, Css, Node.js, Express.js, React, Angular, Git.
- Areas : Application Development, Cloud Computing, DevOps, Data Science

SOFT SKILLS

- Effective verbal and written communication
- Active listening
- Decision making and Leadership
- Team collaboration
- Creativity and innovation
- Adaptability

PROJECTS

Virtual Art Gallery /MERN/

- Is a full-stack web application - allows users to explore, upload, and manage digital artworks in an interactive online gallery.
- It includes five main modules – User Authentication, Artwork Upload, Favorite Artist Gallery, Artist Profile & Community ensuring a complete art-sharing experience.
- To be deployed in AWS EC2.

API Hub /HTML, CSS, JavaScript/

- The API Hub is a centralized web application integrating multiple APIs like Gender prediction, Random joke, Pokémon and Marvel cards, Image search, and more.
- It demonstrates real-time data fetching, modular API handling, and clean output visualization for user convenience.

Mini Projects/python/

- Sky Cast-Weather Information System
- Sort Vision-Sorting Analyzer
- Essence Extractor-Text Summarization

TRAINING AND INTERNSHIPS

Gen AI (6 weeks training) - Internshala

The key highlight for me was developing a chatting assistant and a Telegram bot using Python and OpenAI API, as well as exploring AI Image Generation tools such as Midjourney, DreamStudio, and Playground AI.

Image processing using AI Tools (3 week Internship) - Aquaconnect

Gained practical exposure through a real-world image-processing project, specifically counting shrimps in an image. Used YOLO Model for this object detection task.

MERN Stack Internship (2 months)- WebStackAcademy

Developed full-stack application using React and Node.js. Focused on foundational programming, responsive design, and end-to-end project building using SDLC methodologies.

COURSES & CERTIFICATION

The Joy of Computing Using Python - NPTEL - 67%

Problem Solving through Programming In C - NPTEL - 72%

Programming in Modern C++ - NPTEL - 83% (Topper 5 %)

Cloud Computing - NPTEL - 83% (Topper 2%)

MongoDB Basics for Students

Data Analytics using Python - IT expert training

Java Programming - Udemy

TechCacus'24 - JAM, Code Debugging(Saveetha Engineering College)

Blockathon'24 - CGPA Calculator(Dept_CSE, Velammal Engineering College)

Electrowiz'25 - Idea Ignition(Dept_ECE, Velammal Engineering College)

SIH Internal Hackathon'24 - Mobile App_ Direct Market Access for farmers

SIH Internal Hackathon'25 - Earthquake Stabilized Dialysis System
